Technology Center 2100

S I R:

The last two papers rendered by the Patent and Trademark Office in connection with the above-referenced application (the Decision on Petition dated April 22, 2004 and the Decision on Petition dated March 23, 2005) have both incorrectly identified the Serial No. for this application as 09/096,133, whereas the correct Serial No. is, as set forth above, 09/096,113.

This incorrect designation of the Serial No. by the Patent and Trademark Office has already once caused this application to erroneously be sent to the Patent and Trademark Office storage facility by virtue of the Patent and Trademark Office erroneously believing that a Request for Reconsideration of the aforementioned Decision on Petition dated April 22, 2004 had not been filed. In fact, a Request for Reconsideration of that Petition had been filed, but since it was identified with the correct Serial No., and the aforementioned Decision was identified by the Patent and Trademark Office with the incorrect Serial No., the two papers were not matched together and it was assumed that no such response had been filed.

Now, this same error has been perpetuated by the Patent Office in the caption for the Decision on Petition dated March 23, 2005. That Petition withdrew the holding of abandonment, and stated that the application is being forwarded to the appropriate Technology Center. Applicant is unable to ascertain, however, whether the application is being forwarded with the correct Serial No. or under the incorrect Serial No. indicated on the Decision on Petition dated March 23, 2005.

Correction of the Patent and Trademark Office records is therefore respectfully requested, and all future papers from the Patent and Trademark Office are requested to refer to the correct Serial No. 09/096,113.

Submitted by,

Stan H. Noll
